Kalling all Kitties for Koffee

This gorgeous, set-of-four mugs are a great gift giving idea for the cat lover in your life. Stylish and able to hold a mega-mug of coffee or tea, these sexy kitties are the cat's whiskers.

Wetnoz bowls for wet noses

The stylish Metro and Studio bowls from Wetnoz are a more affordable version of the Ultra range. Still packing lots of style and practicality, these swanky designs come in range of sizes and colours for you to co-ordinate. Smaller versions mean that smaller pets can still dine in style.

Scratch me happy

The Scratch box is an all-in-one cat scratcher that is impregnated with catnip. Easy to assemble and fun to fold, this ecologically sound scratcher will save your furniture and sanity.

A fine measure

Muttlerly and Catlery are fine examples of stainless steel homewares for the pet lover. The measuring cup is an exact cup size so you can get the right amount of pet food. All items are dishwasher safe.

More Loopies to go loopy over

Dogs love Loopies—these silly plushy toys that squeak when chomped and make wild noises when tossed and dropped.

Essential Ingredients are a recipe for Wellbeing

This is a complex recipe of 16 essential ingredients designed to boost your dog's levels of vitamins, minerals, antioxidants and fatty acids in their daily diet.

Make a clean sweep

This brush and dust-pan set is as fun as it is practical. The critter brush attaches to the pan and the whole unit can be hung out of the way.

The products featured in this section were chosen prior to general advertising being solicited from any potential product suppliers. Hence the products reviewed were chosen without regard to advertising.

Is your dog getting its recommended daily intake of Pegetables?

These fun and tasty dog treats are made with real vegetables. Packed with antioxidants, fibre, omega fatty acids and vitamins, these veggie snacks are a great chew. Kosher, halal and vegan for all disciplines.

Paw Breakers, the jaw-breakers for cats

Packed with all natural, super strong catnip, these little balls are a treat and toy rolled into one. The Candy for Cats- a purrrfect combination.

Light up your fishy world

Aquarium ornaments are certainly getting fancy and hi-tech these days. If you're over the algae covered skeleton laying on top of the treasure chest, then how about these fibre optic cuties. Made of polyresin, these hand painted critters are for both fresh and saltwater aquariums. The colours change as the ornaments spit out bubbles.

More Trouble & Trix turns cats into kittens

This unique range of natural catnip toys is sure to have a style to keep your cat amused and enthused for play. Made of strong, the durable materials and the catnip essence can be refreshed.

De-shed and groom with Noah's

The answer to hairy problems is the De-Shedding kit from Noah's grooming product range. These great brushes remove dead and loose undercoat better than conventional brushing or combing. The kit comes with a 50mm blade for tight areas and a 100mm blade for open areas. The comfortable grip handle also fits other sized grooming blades so you can mix and match to get the size that's right for you.

The kitty doctor is in

Kitty Vet Health Detector is the first line in detecting feline urinary tract infections. These simple to use granules can be poured directly on top of your cats kitty litter. Five minutes after your cat has used its tray, the granules can be inspected. Any change in colour and you'll know if your cat has a health problem. Clever Kitty Vet.

Eco Pets for the planet

Eco dogs and cat toys are made with unbleached and undyed cotton fibres and fill. They come in a range of designs and shapes and even the packaging is printed with soy-based inks and recycled materials. Good for your pets, good for you and good to our planet.

Peek-a-Boo it's the Tic-Tock-Teaser

Smart cats love to be entertained by these great toys. The Tick-Tock-Teaser has a swinging mouse and streamer that is boingy for batting fun. Also in the range is the Peek-a-Prize Box.

Breakfast and dinner with the Brake-fast

You've got a gulper, a slurper, a chugger and a general food hog that inhales their food? This is the bowl for meal times as its clever design slows down food consumption. The three pillars strategically placed mean that your canine Hoover has to navigate and negotiate to get their food. Gulping food can lead to digestive and health problems, so this is a very smart supper essential. Dishwasher safe and highly recommended for chow hounds.

Be a Lazy Dog around the house

These soft and cool jammies are just right for long summer nights. Sweet dreams are made of this cotton t-shirt top and bottoms. With doggie motifs that say 'Play Dead', 'Beg' and 'Go Home', they're sure to be a bedtime favourite.

Pick up a Picky Pooch this Christmas

Treats and the festive season go paw in paw. Why not pick up some Picky Pooch treats for the ones you love. Yummy treats made from wholemeal flour, oats, wheatgerm and decorated with carob and yoghurt icing. Yum!

Tattoo wearable art just went to the dogs

Ed Hardy, iconic tattoo artist has been exposed in recent years by fashion designer extraordinaire, Christian Audigier. These sunnies celebrate the bull dog with a little bit of bling and a whole lot of attitude. Just remember to keep them all to yourself and no sharing with the dogs.

For your dearly departed

Remember your friend with these funky bones. Made from vitrified ceramic, these bones are designed to mark a special spot in your garden for a passed pet. They're a little bit gothic but are an arty way to memorialise your best friend.

Popware for pets at home or on the go

We were tipped to the Popware range at a major gift trade show earlier this year. These clever bowls are great for around the house, travelling or on a dog walking adventure. They come in a range of colours and designs and are as collapsible as a magician's top hat.

"Walter Says" the cutest things

Designed in WA, these quirky and fun homewares, t-shirts and mugs will bring a smile. T-shirts are made from the softest cotton and we love the shopping bag that folds into itself and becomes a wallet-sized pouch for unexpected shopping trips.

Torus, more than just a water bowl

We love this bowl because it's well designed. The design comprises a water storage area and drinking well. The bulk of the water is stored and protected inside its hollow walls. A replaceable carbon filter reduces flavours and trace elements commonly present in our municipal water supply. The water level in the drinking well is always high enough to allow easy drinking but low enough to minimise water spills and splashes. Paws down, we feel this is one of the best products we've seen this year.

Light me up Scotty

Light me up and turn me on. This special lamp celebrates the classic form of the Scotty dog. It's lightweight and looks good as a floor lamp or on furniture. We're not going to mention what part of the dog the light bulb fits into.

Birds love the Jungle Talk

The Jungle Talk range of birdie toys is designed for enrichment and exercise. Exercise is not only fun for birds, it's a necessity in captivity. These fun toys provide your birds with fun, interactive and safe entertainment.

This Christmas wreath is not strictly for the birds

Here's a festive wreath with a difference. Made from glorious bird feathers and incorporating peacock plumage, this is a wreath that's a departure from the traditional offerings.
