From pretty to practical, just a few options available on the pet market through pet stores, vets & groomers.

1.

COAT KING
by *Mars*

This tool is a user and pet friendly way of removing dead hair and undercoat. Available in various sizes to suit all coat types.

By removing the undercoat you reduce hair matting and reduce hair left on floors and furnishings. *Amazing results in a very short time!*

TROY

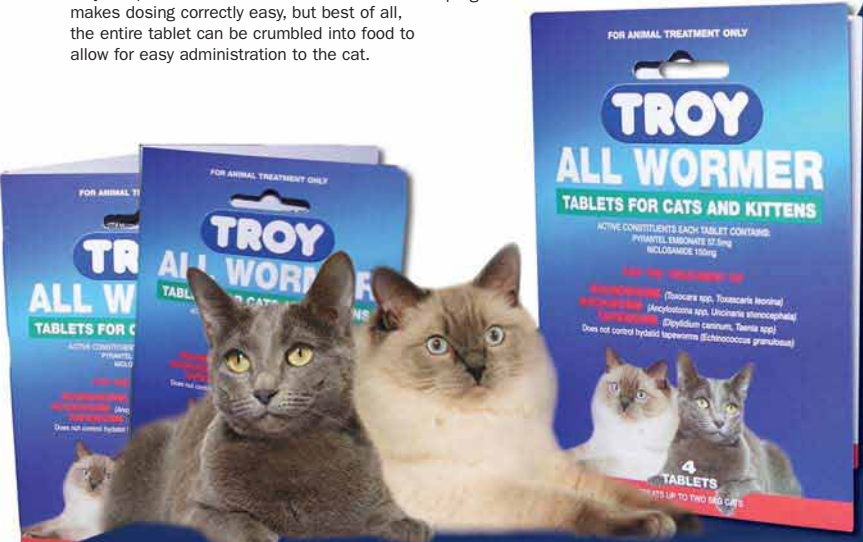

ALL WORMER
TABLETS FOR CATS AND KITTENS

An effective worming program is needed for all domestic pets mainly for the long term health of the pet but also for the health of the pet owners. Young pets particularly are prone to carry parasite burdens, particularly Roundworms, and these must be treated with an effective wormer to ensure the correct growth and health of the young animal.

TROY ALL WORMER TABLETS for Cats and Kittens provides an excellent solution for dealing with the problem of de-worming your pet cat. Not only are the actives of each tablet highly effective for the treatment of Roundworm, Hookworm, and Tapeworm but they are palatable. The small scored tablet makes dosing correctly easy, but best of all, the entire tablet can be crumbled into food to allow for easy administration to the cat.

TROY, an Australian Owned Company, is proud to present another affordable, quality product to the market that makes animal health management easy for the pet owner.

The four tablet card can treat the largest of cats or two 5 kg cats. Each palatable tablet treats up to 2.5 kg body weight and the scoring ensures that kitten doses can be easily worked out and accurately given. Dosing for Hookworms and Roundworms should be started with kittens at 6 weeks of age and then repeated at 8 and 12 weeks. Adult cats should be treated every three months for sound health to be maintained with regard to parasite burdens. It should be noted that this product is safe for use in pregnant cats.
